### Institute of Computer Science AGH

#### Abstract

During the presentation the structure and potential of the Institute of Computer Science AGH will be sketched-out. The presentation is intended to seek potential collaboration among the Sano community members and our Institute. We will present selected projects and areas of research along with stressing out the ones connected with Sano area of interest.

**Prof. Marek Kisiel-Dorohinicki** Director of Institute of Computer Science, AGH, works in the area of agent systems, software engineering, concurrent and distributed computing and simulation.

**Prof. Aleksander Byrski** Deputy Director of Institute of Computer Science, AGH, works in the area of metaheuristics, in particular agent-ones, computing and simulation using HPC.
